

Town of Chatham
Conservation Commission

NOTICE TO APPLICANTS & REPRESENTATIVES

January 31, 2012

To avoid a hearing continuance, please be certain to mark the project in the field *no later than* 14 days prior to the scheduled hearing. This means the following:

- Labeled stakes must be at the corners of any proposed structure or hardscape or other proposed feature;
- Labeled stakes should be at 100ft from the resource area and also the 50ft No Disturb Zone from the most landward resource area;
- Any trees to be removed must be ribboned in the field;
- Edge of a wetland shall be flagged;
- If practical, photos of existing site conditions should be submitted or may be projected at the hearing (with advance notice to the conservation office).

NOTE: Failure to clearly identify the project in the field two weeks prior to the hearing will result in an automatic continuance.
